**Subject:** Re: CFAC Bkg SAP - Comment Discussion

I have very limited time this week, but if David and Brian can make this please proceed.

Mike

In that regard, I'd like to schedule a call to discuss the other comments on the document. The attached Word document includes CDM Smith's preliminary comments on the SAP. The comments in green are those related to surface water that we already discussed. The comments in yellow are the key issues that still need discussion and resolution. In particular, we are seeking EPA input on the desired analytic approach for the collected background data. For reference, I've also included the PDF markup that David provided to me with his comments.
